### HIGH-PERFORMANCE INVERTER HEAT PUMPS

Introducing

# ULTRATEMP HIGH-PERFORMANCE HEAT PUMPS

With today's record energy costs, there's never been a better time to invest in a heat pump. Compared to gas, oil or electric heaters, UltraTemp° High Performance Heat Pumps use just a fraction of the energy to generate the same amount of heat. In fact, just 25¢ worth of electricity produces \$1.50 worth of heat generated by other methods. That means more comfortable water temperatures and longer swimming seasons for you and your family.

#### PENTAIR ULTRATEMP HEAT PUMP FEATURES:

- Pentair heat pumps transfer heat from the air into the pool using only a fraction of the energy required to heat the pool directly.
- The UltraTemp HXi heat pump offers best in class efficiency with COP (coefficient of performance) ratings far in excess of standard heat pumps.
- The UltraTemp HXi heat pumps feature variable speed compressors and fan motors (full inverter). These operate at reduced speed when full power is not required, cutting electricity costs and noise.
- Pentair heat pumps use the EPA-recognized, environmentally safe, non-ozone depleting R32 refrigerant. This allows the UltraTemp HXi heat pump to be awarded the Eco Select® brand accolade for environmental responsibility.
- 100% titanium heat exchanger assures corrosionfree performance for extra long life and value.
- Full-colour, LCD touchscreen displays an intuitive, menu with easy to follow icons and messages.
- Self-diagnostic software continuously monitors system for peak performance.
- Thermostatic Expansion Valve (TXV) controls refrigerant flow and optimises efficiency over a wider operating temperature range.

- Automatic defrost feature senses refrigerant temperature and helps prevent the UltraTemp heat pump from freezing, allowing the unit to operate effectively at lower temperatures.
- Perfect companion to IntelliCenter® or EasyTouch® Control Systems—heat pump control can be transferred to a centralised control system that manages all your pool/spa operations and poolscape features.
- > Easy barrel union plumbing connections.
- Market leading warranty.\*

\*15 year warranty limited to titanium heat exchanger. Visit pentairpool.com.au for full warranty terms and conditions.

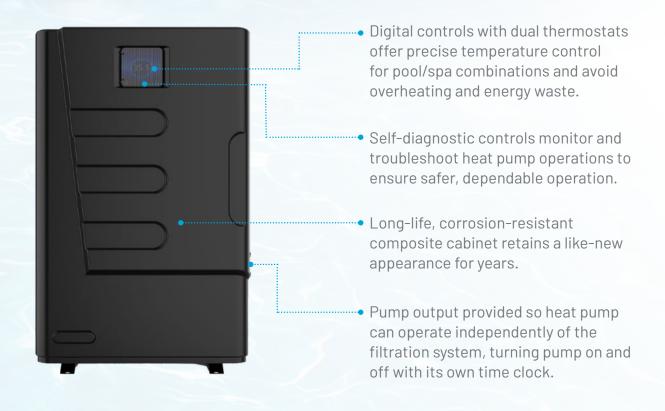

Pentair UltraTemp heat pumps are equipped to automatically heat or cool your pool water based on temperatures you set.

Select the heating or cooling mode and the intelligent thermostat will command the heat pump to heat or cool the water to your selected temperature.

# "Automatic heating and cooling!"

Clearly, a heat pump is the best choice for pool heating.
Also clear is the best-in-class performance and value of the fully-featured UltraTemp heat pump.
Contact your pool professional today to learn which model is right for your pool.

## **ULTRATEMP™ HXi**

- Horizontal exhaust for small footprint and installations with overhangs
- · High efficiency
- Intuitive LCD touch screen
- Titanium threaded heat exchanger
- · Heats and cools
- Auto defrost

#### **FEATURES:**

#### **High Efficiency**

With a COP as high as 14.5, the UltraTemp offers over six times more heat power than electrical power input. Giving you exceptional performance at the lowest running cost.

#### Titanium Threaded Heat Exchanger

Provides maximum corrosion/ erosion resistance, and improves heat transfer efficiency by up to 30%. Its rotating waterflow also improves descale ability.

#### **Multi-function Modes**

Switches mode between heating and cooling and offers auto defrost by changing the refrigerant flow path. Comes in 4-way valve.

#### **Electronic Expansion Valve**

The EEV supports automatic adjustment of refrigerant flow rate and makes the system work under optimized conditions for the purpose of fast heating and energy saving.

The EEV is better than capillary tube.

#### Coloured L

Easy to use an programming. better visibility either be wallfree standing.
