

ALL NEW
SR SERIES
SALT CHLORINATOR

A NEW STANDARD IN SALT CHLORINATOR TECHNOLOGY

The Sta-Rite® SR Series Salt Water Chlorinator is a fully automated system and is proudly made in Australia. Digital control, battery back-up and selfcleaning (reverse polarity) as standard. It is available in two sizes – 20g/hr and 30g/hr and is available with optional two additional timed power outlets. The add-on pH system maintains your pool water in the correct pH range – making the SR series one of the most efficient and smartest salt chlorinators on the market.

Electrolytic salt chlorination is the easiest, most effective and convenient way to keep pool water sparkling clean. The SR Series Salt Chlorinator uses common table salt to produce all the chlorine your pool needs, right in your pool- safely, effectively and automatically.

- Same sanitation performance as manual chlorine addition without the drawbacks
- No need to buy, transport and store expensive chlorine compounds.
- No more odor, stinging eyes and irritated skin.

SR SERIES SALT CHLORINATOR

Battery backed up digital clock

Intuitive touch pad control

Reverse polarity self cleaning cell

Optional pH doser for automatic water balance

FEATURES & BENEFITS

- Fully Automated
- Optional pH system keeps the pH of your water in the correct range. This ensures that the sanitiser works with optimal efficiency and keeps your water balanced.
- Proudly manufactured in Australia.
- Intuitive touch-pad electronic control.
- Reverse-polarity, self-cleaning cell.
- Certified to Australian Standards.
- Additional timed power outlets for connecting pool lighting or other accessories (optional).
- Battery-backed up digital clock (all models).
- Self diagnostics including gas detection, dryrun, low water temperature and low/high salt alarms.
- Guaranteed by a 2+3 year warranty - 2 years full plus further 3 years pro rata on cell.

Chlorinator Sizing Chart

Amount of Chlorine required per hour (grams per hour)

To calculate the chlorine output required:

1. Determine your pool size (litres)
2. Move along the horizontal line until you reach your climate zone.
3. Go down to determine the amount of chlorine you require (g/hr)
4. Always allow an extra 10- 20%- if your budget allows for it.
5. In commercial installations allow at least 100% extra.
