

INTELLICENTER WIFI KIT

INSTALLATION INSTRUCTIONS

Step 1 – Turn off power to the IntelliCenter at the breaker. Undo the 2x screws in the top left and right corners and flip down the IntelliCenter control panel. Locate the mounting holes for the wifi PCB.

Step 2 – Insert the PCB into the mounting holes.

Step 3 – Locate the plug on the left side of the IntelliCenter enclosure. Remove the plug.

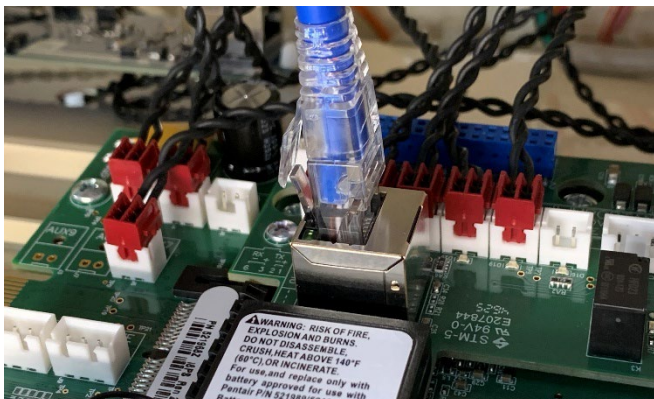

Step 4 – Remove the nut and feed the gold antenna connector through the hold from the inside.

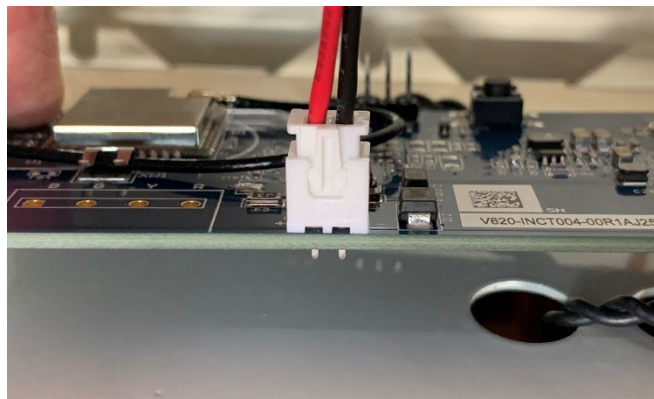

Step 5 – Secure the antenna connection with the nut.

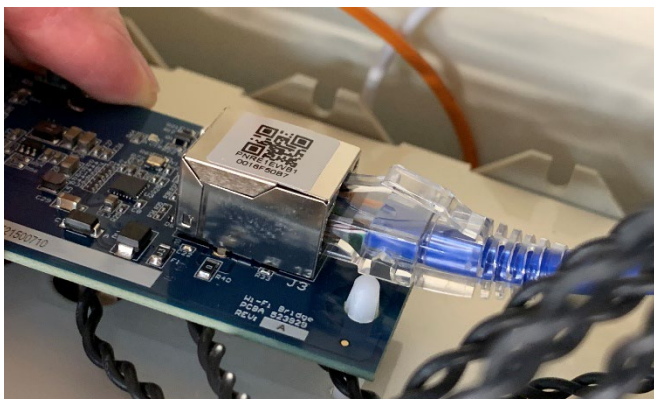

Step 6 – Screw the antenna to the antenna mount.

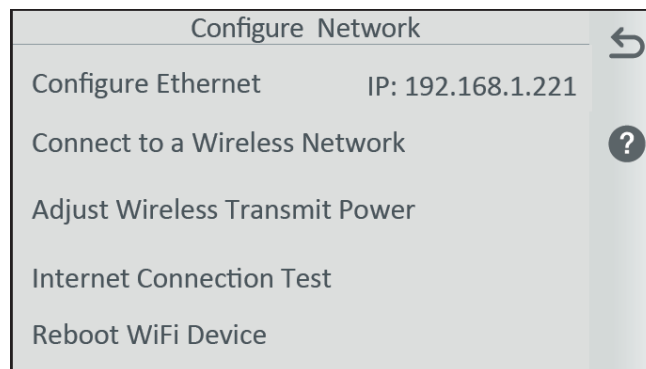

Step 7 – Connect the ethernet cable to the IntelliCenter main board.

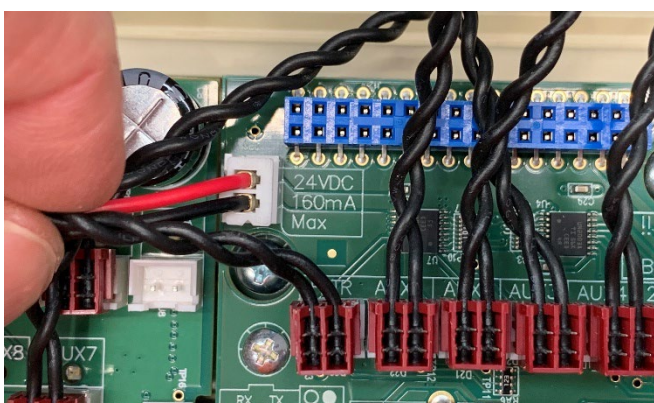

Step 10 – Connect the power cable to the wifi board. Close the IntelliCenter control panel and secure the two screws. Switch on power to the IntelliCenter at the breaker.

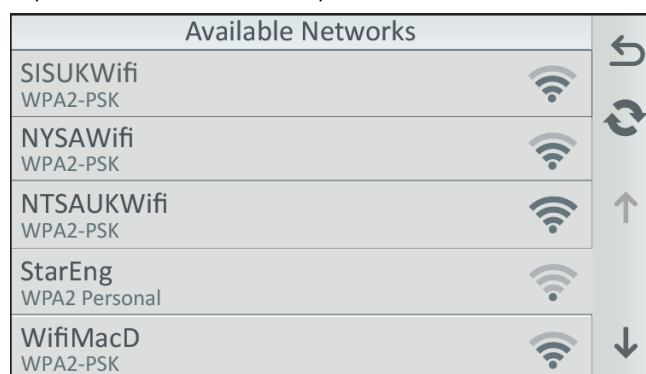

Step 8 – Connect the ethernet cable to the wi-fi board.

Step 11 – At the IntelliCenter Home Screen, tap the Settings Icon at the bottom right of the screen. Scroll to and tap Advanced System Configuration. Scroll to and tap Network and WiFi Setup.

Step 9 – Connect the power cable to the IntelliCenter main board, terminal is marked 24VDC.

Step 12 – At the Network and WiFi Setup Home screen, tap *Connect to a Wireless Network*. Select the desired network. If you do not see the network, tap the Refresh Icon. Enter the network password. Return to the Network and WiFi Setup Home Screen and tap *Internet Connection Test*.
